The company has always adhered to the spirit of taking from society and giving back to society, and has been actively involved in and concerned about the development of Taiwan's ceramic industry and modern pottery art.

Since the establishment of the Golden Pottery Award in 1992, seven competitions have been held, each attracting hundreds of entries.

Through the Golden Pottery Award, we aim to encourage outstanding artistic talent and stimulate the advancement of the ceramic industry.

In 2023, the company opened the HCG Gallery, showcasing outstanding ceramic artworks from both domestic and international Golden Pottery Award competitions.

We hope that this exhibition space will give artists a sense of honor and encourage the nurturing of more innovative and traditional craftsmanship skills, allowing the beauty of Taiwanese pottery to continue to shine.

Finally, we hope that all employees can continue to grow with the company, adhere to the concept of sustainable development, constantly seek innovation, and adapt to the rapidly changing trends in economic development in the future.

With the efforts of all our colleagues, we believe that we can strive for excellence and make Hocheng Corporation a long-lasting enterprise committed to sustainable development.

Finally, I wish all shareholders good health and all the best in everything.

Thank you, everyone!

CSR — HCG Gallery opened 【2023.12.15】

In 1931, Mr. Chiu Hocheng founded Hocheng Company and began to engage in the production of bathroom ceramics. In 1991, he established the "Chiu Hocheng Cultural and Educational Foundation" to promote and sponsor activities related to art, culture, technology, sports, etc. At the same time, a working group was formally established to actively engage in the preparations for the "Golden Ceramics Award". The "First Ceramics Golden Ceramics Award" will finally be presented to the public as expected.

Memorabilia of 『 Previous Ceramics Golden Ceramics Awards 』 :

▲ Collection of ceramic works and paintings from previous Golden Ceramic Awards.

▲ The main entrance of the HCG Gallery on the third floor of Hocheng No.3 Factory

The first session in 1992 : In the first session, only the student group could participate, divided into "traditional innovation" and "shape innovation".
 The 2nd session in 1993 : Added social categories and divided them into two categories: "traditional innovation" and "shape innovation".
 The 3rd session in 1994: The participants have been expanded to all ages, and even gentlemen in their eighties participated.
 The 4th session in 1995 and the 5th session in 1996 : The director's review responsibilities were added, and ceramic art professionals and media reporters were invited to witness.
 The 6th session in 2000 : Entries came from 52 countries on five continents around the world, with a total of 759 works received. A Taiwanese ceramic artist won the first prize.
 The 7th session in 2014 : Since the 6th International Golden Ceramics Awards, the ceramics competition has been suspended for many years. A lot of attention has been paid to the development of Taiwan's ceramic industry and modern ceramics. Corporate responsibility and spirit are based on With the positive attitude of taking from the society and using it for the society, the 7th Taiwan Golden Ceramics Award Competition was finally held as scheduled after two years of preparation and planning with corporate surplus allocation budget.

Sustainable Investment — Ceramic Manufacturing Process

Independent investment in energy-saving and consumption-reducing equipment	Instructions before improvement	Explain the benefits after improvement
<p>Diesel forklift(11 units) → Electric forklift</p> <p>(Replacement frequency: 1 unit/year)</p>	<p>1. Oil consumption/year of diesel stackers in the whole plant: 11 units * 4L/hr * 4hr/day * 365 day/year = 64,240L/year (64.24 tons/year).</p> <p>2. Carbon emissions of diesel forklifts: 64.24 (metric tons/year) * 2.606 (kg-CO₂e/liter) = 167.4094 (metric tons CO₂e/year).</p>	<p>1. Electricity consumption/year of electric stacker: 11 units*10(kw)*4(hr/day)*365(day/year)=160,600 kw/year (160.60 kilowatt-hour/year).</p> <p>2. Carbon emissions from electric stackers: 160.60 (kilowatt-hours/year)*0.509 (metric tons CO₂e/kilowatt-hours)=81.7454 (metric tons CO₂e/year).</p>
